

## New Mexico Postsecondary Census Enrollment Trends

### Fall 2015 - 2024

Census enrollment is a snapshot of all enrolled students taken approximately 21 days after the first day of classes. This differs from the official end-of-semester enrollment that the New Mexico Higher Education Department typically reports, which is not available until several weeks after a semester ends. The delay allows time for institutions to finalize grades and submit, edit, and process their data files. Census enrollment offers an early look at what final enrollment is likely to be. While final numbers are typically slightly higher than the Census snapshot, overall trends are usually consistent.

The tables in this report reflect data submitted by New Mexico's public institutions following the Census date for each of the past nine fall semesters.

Each table includes four summary percent-change columns:

- 2015 to 2019 – change in enrollment before the onset of the COVID-19 pandemic;
- 2019 to 2024 – change from the year before the pandemic through the most recent year;
- 2015 to 2024 – overall enrollment change over the full nine-year period; and

## New Mexico Postsecondary Census Enrollment Trends

### Fall 2015-24

#### A Comparison of Census Data to End-of-Semester Data

Final enrollment is typically higher than the census count, but the overall relationship between the two has remained consistent over time.
