

JULY NEWSLETTER

The Official Newsletter of GEAR UP New Mexico

"Build your life on your dreams; because dreams never have bad endings."

- M.F. Moonzajer

STAFF NOTE

The GEAR UP New Mexico team would like to take this opportunity to extend our deepest gratitude toward the New Mexico Higher Education Department and all of our partner districts. Thank you for your dedication and commitment to making the GUNM program what it is today.

It is because of all of your time, effort, energy, and support that we have effectively and successfully served thousands of students in our state over the past seven years of this current grant cycle.

GUNM has been important to so many people, and we want you all to know that you have been just as important to us. Without you, the gears at GUNM would not be able to go-round.

That being said, It is without a doubt that our students and their families are more ready than ever to take on their college & career journeys - this is only the beginning of many successes to come, and we are humbled to be a part of those journeys.

Thank you once again for all of your support and dedication.

Panel Q&A!

Students @ New
Mexico Tech!

Campus Tour @
DACC!

GUNM CAC

College Advantage Camp

GEAR UP Students from our various districts met up at The university of New Mexico this past June for College Advantage Camp (CAC)!

Over the course of 2 nights and 3 days, students had the chance to experience life as a college student all while improving their communication, networking and professional skills!

Here is a look at some of the highlights from this year's CAC!

CAC Graduation & Recognition!

CAC Graduation & Recognition!

CAC Graduation & Recognition!

CAC Graduation & Recognition!

Team Building & Networking!

Touring The UNM Campus!

Scholarship Search Workshop!

GUNM STUDENT OF THE MONTH

JULIO

MIRTO

GET TO KNOW JULIO

Julio Mirto is a recent graduate of Shiprock High School. He was a part of the GEAR UP College Engagement Organization (CEO) as well as many other extra curricular activities. During his time as a CEO, Julio served as an example to his fellow students both inside and outside the classroom. As a student athlete, Julio juggled multiple responsibilities throughout the year, but was always sure to prioritize and succeed.

Julio credits GEAR UP as being one of the most beneficial and supportive resources available to him during his senior year of high school. Julio says joining GEAR UP made it possible for him to search for and take part in every college and scholarship opportunity there was.

Here is what Julio had to say about his time as a GEAR UP student:

"This year being my first time to attend school in the US, it was a big adjustment. GEAR UP activities taught valuable leadership skills and I was instantly drawn to the program. Even though my career path was not administrative in nature, I believe that true leadership skills, such as responsibility, self-awareness, and compassion to serve could be applied in everything you do. Whatever I may achieve in the future, I will always remember GEAR UP's contribution in discerning my career choices."

Julio will be attending Regis University in Colorado with plans on becoming a doctor. Julio says serving the community as a medical professional is all he can see himself as in the future.

SCHOLARSHIP OPPORTUNITY

About:

As part of a new generation of students getting an excellent education, you have the ability to solve a major issue that affects thousands of people every day. Cool-Off™ strongly believes that your creativity may hold the answer for revolutionizing how people can better cope with excessive heat, whether it be at the workplace or under the summer sun. The goal is to better protect individuals from heat stress and harmful UV rays..

Eligibility:

Minimum GPA: Not applicable

Residency: Must reside in the United States

Enrollment status: Full-time

Academic level: Incoming freshman, Incoming transfer (undergraduate) - Freshman, Sophomore, Junior, Senior

How To Apply:

In 750 to 1500 words, propose a new product that could better protect individuals from heat stress and/or damaging UV rays. Describe a product, whether ingested or external, that could lessen the consequences of spending time in direct sunlight and/or in high temperature workplaces. The essay should include the perspective for both the consumer and the business offering the product. It is encouraged that applicants include possible benefits and estimated heat reduction, with calculations as evidence for their proposal.
