NEW MEXICO HIGHER EDUCATION DEPARTMENT

KATE M. O'NEILL, ED.D. CABINET SECRETARY (DESIGNEE)

MICHELLE LUJAN GRISHAM GOVERNOR

January 23, 2019

Dear Higher Education Leaders,

I would like to congratulate you on the incredible work that you have accomplished over the last few years! Students transfer between our higher education institutions and need to know that their courses will transfer and articulate to their chosen degree programs in order to graduate in a reasonable amount of time. With this goal in mind, administrators, faculty, staff, and legislators came together to create a common course numbering system and degree mapping platform to make sure that credit hours count and students complete.

I am pleased to join such a collaborative, dynamic environment and look forward to working with you on future endeavors to address college affordability, improve teacher training, and build Centers of Excellence around cyber security, sustainable energy, agriculture and biotech. I know that together we will accomplish great things!

Sincerely,

Kate O'Neill, Ed.D. Cabinet Secretary-Designee

NEW MEXICO HIGHER EDUCATION DEPARTMENT

SUSANA MARTINEZ GOVERNOR DR. BARBARA DAMRON CABINET SECRETARY

It has been an exciting year for Higher Education in New Mexico: common course numbering, general education reform, and degree mapping are being implemented across the state; new rules for registration and licensure of the private post-secondary higher education institutions in New Mexico went into effect; and our Adult Education and GEAR UP programs have achieved incredible results. Each of these accomplishments was the result of years long collaborations between the New Mexico Higher Education Department (NMHED), New Mexico's higher education institutions, and countless faculty, staff, business leaders, and legislators. These are a testament to how much we can achieve when we work together toward the goal of improving higher education for students!

The following annual report provides the details of how some of our accomplishments will improve the lives of New Mexico's students. New for 2018, in addition to NMHED led programs, we have added profiles of each of New Mexico's public higher education institutions (HEIs) to the report. Each profile is a current snapshot of each institution and includes:

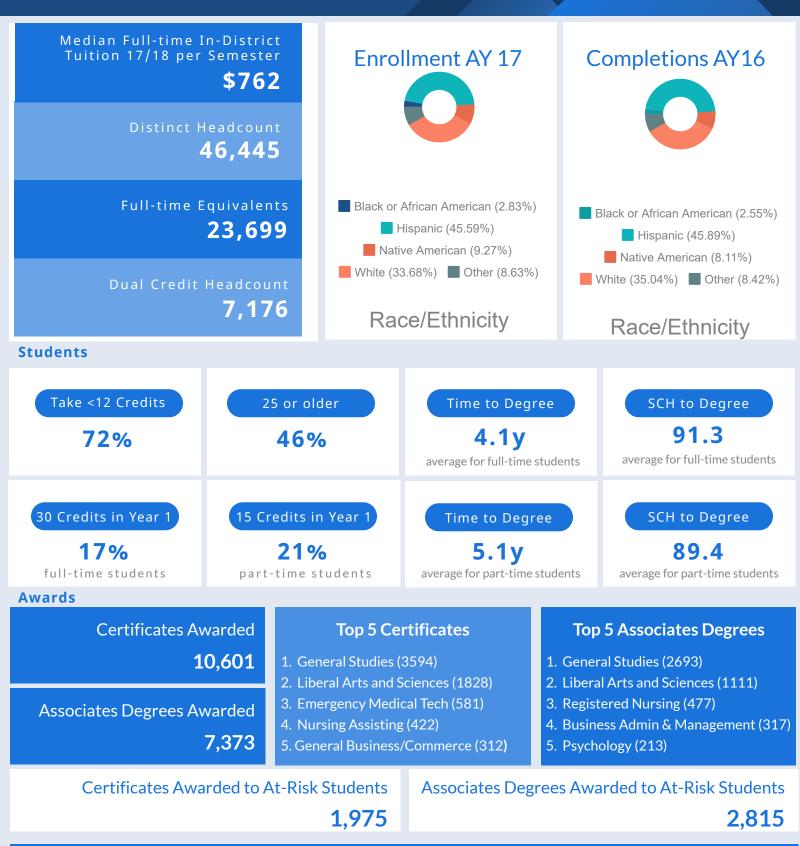

- Student enrollment demographics, disaggregated by
 - Race/ethnicity
 - Age
 - Course load (full-time/part-time)
 - Level
- Completions by award level, disaggregated by
 - Race/ethnicity
- Tuition cost
- Top 3 certificates or degrees awarded in AY 16-17
- The number of awards earned by financially at-risk students in AY 15-16
- Community engagement activities
- Number of faculty
- Faculty compensation
- Revenue
- Use of funds

In addition to its annual report, NMHED is planning to publish separately longitudinal analyses of its programs, including common course numbering, degree mapping, academic program approval, and dual credit. It is our hope that higher education policy makers to will use these reports to make decisions regarding these programs and to assess next steps for the state.

As the next era of higher education in our state begins, NMHED is ready to continue is collaborations with institutions, administrators, faculty, staff, business leaders, and legislators to improve higher education for New Mexico's students.

In partnership with NASA, CNM hosts STEM days for high school students each year. Students have the opportunity to hear panel discussion on STEM topics by local scientists, engage in hands-on activities and demonstrations, and learn about CNM programs and resources. Each year on International Hour of Code Day, CNM Ingenuity hosts a free computer coding event for students in grades 4-12. They learn the basics of coding and create a basic computer game, while being provided pizza.

Through a \$3 million grant from the U.S. CNM hosted the New Mexico Ethics in Department of Labor, CNM Ingenuity man- Business Awards which highlights busiages the New Mexico Information Technol- nesses and business leaders who are comogy Apprenticeship Program grant aimed at mitted to ethical business practices and grant is to create 300 new IT apprentice- Mexico Leadership Summit. Pi Day: The NMJC Math and Science Depart- Please see NMJC's website for more ment sponsors an annual Pi Day event on March 14th. The Pi Day event features over 100 booths and displays related to math and science. The event focuses on young students and features interactive activities where students perform calculations and experiments. The event is free to all families and is supported by the college and local businesses. In 2018, over 2,500 students and parents attended the one-day event.

Titanic Exhibition: NMJC operates the Western Heritage Museum as a community and educational activity. The museum recently arranged for a special showing of artifacts from the Titanic collection recovered from the ship wreck site. Over a three month period, the exhibit was viewed by 35,363 area residents.

Staked Plains Round-up: NMJC and the Lea County Cowboy Hall of Fame sponsor an annual outdoor rodeo and western event for 3rd and 4th grade students.

K-12 Education

Workforce Development

Students engage in community programs that serve exceptional children or their families. This can be in the form of helping with the organization and support of programs such as Special Olympics or Hoops for Hope. Some students choose to be involved in community or parent support groups such as Silver City Autism Awareness group.

Staff serves on Sustainable Leadership Council where obstacles and challenges are discussed in assisting individuals to gain meaningful skills towards employment.

Student Success

High School Graduation rate is 100% for students that are enrolled at graduation age.

Most program offerings are between 1 week and 2 years.

Instructional Resource Center

The Instructional Resource Center (IRC) at New Mexico School for the Blind and Visually Impaired (NMSBVI) serves as a statewide lending resource for Braille and large print textbooks, as well as other specialized equipment used by students with visual impairments. Each year, books and equipment from the IRC are loaned to schools for use by qualifying students, and then returned to the IRC to be used again by other students. This stretches educational dollars used to purchase these expensive items, and makes more textbooks available to students in a timely manner for use in their local educational agencies.

The Mission of NMSBVI

NMSBVI, an innovative leader and unifying entity in the field of educating students **birth** -high school who are blind or visually impaired, will identify and ensure quality education through collaborative relationships with students, families, and local/ state/ national partners to provide outstanding advocacy, training, resources, and support services, thus ensuring that all students who are blind or visually impaired will become independent, Productive members of their communities.

Birth to 3 Years

The New Mexico School for the Blind and Visually Impaired (NMSBVI) provides statewide direct services to families of young children who have a diagnosed visual impairment or who are considered to be at risk for receiving a VI diagnosis. Services are a partnership with NMSBVI, New Mexico's Family, Infant, Toddler Program (FIT) and the Navajo Nation; all children are served by IFSP team decision. Services are delivered in the family home or in another community environment that supports the child and his/her family.

Early Childhood Program in Albuquerque

The Preschool and Kindergarten Program serves children who are blind or visually impaired between the ages of 3 and 6 from Albuquerque and the surrounding areas. Students are required to have a diagnosed vision impairment that adversely impacts their capacity to learn in a more traditional classroom. All students are placed in the program by IEP committee decision held by the student's resident public school system. The academic program for Preschool and Kindergarten consists of literacy (print and Braille), math, concept development, socialization and all aspects of the expanded core curriculum for blindness. Students are encouraged to explore and to become familiar with their immediate environment; then expand outward to travel successfully into new and unfamiliar areas.Guided exploration and self-discovery are used to support learning at every level. The ECP specializes in identifying alternative communication systems for students with multiple disabilities including blindness. All children are placed in the preschool programs by IEP team decision because they require daily support from a teacher of the visually impaired.

NMSBVI Alamogordo

The New Mexico School for the Blind and Visually Impaired (NMSBVI) provides intensive compensatory skill development related to blindness/visual impairment on its residential campus, located in Alamogordo, New Mexico. Services in this setting are part of the full continuum of services for blindness education. The services are a partnership between the student's local education agency (LEA) and NMSBVI. Placement and services are developed in a joint IEP with participation by family, LEA and NMS-BVI staff. In addition to a placement on the residential campus, short-term programs are also available.

Outreach Services

The Outreach Department of NMSBVI is designed to support public, private and BIE schools who serve students who are blind/visually impaired through consultation, some direct service and some mentor support.

Mentor Services: In a partnership with New Mexico State University, a personnel preparation program is available to any educator in the state who desires to gain the skills necessary to teach students who are blind or to serve as an orientation and mobility instructor in New Mexico. The Outreach Department provides mentor services to these interns.

Low Vision Clinic: This clinic offers a special examination to determine if a student's visual abilities can be improved. At the low vision clinic, a doctor of optometry, who has received specialized training in working with children with visual impairments, will measure how well the student sees things that are close and things that are distant, and will determine whether any low vision devices will help the student. If a near or distance low vision device is recommended, the student will have additional opportunity to explore using the device(s) with the guidance of members of the Low Vision Clinic Team.

Assistive Technology: The Consultant provides information and training on the latest technology that supports educational accessibility for New Mexico's students who are blind or visually impaired. In addition, NMSBVI has a technology Lending Library, from which school districts may borrow equipment prior to purchase. Appropriate technology is selected for a student by the assistive technology consultant following assessment of a student.

- Teachers, Counselors, Social workers, Audiologists, Occupational Therapists, Interpreters, Speech Language Pathologists, Nurses, Instructional Assistants
- Certified Developmental Specialists Providing Statewide Early Intervention Services
- Licensed Administrators
- Educational Consultants Providing Statewide outreach Services to Public Schools

Library

- NMSD's new library building opened in the fall of 2014
- It houses over 25,000 books in addition to magazines and other forms of print media
- The building also houses the museum as well as curricular resources and textbooks that are used in the classrooms

Academic Competitions

- NMSD's high school Academic Bowl Team competed in the Western Regional Competition in March 2018
- NMSD's Middle School Meth Team placed 5th out of 39 teams in the National Technical Institute for the Deaf National Math Competition

The Mission of NMSD

The mission of NMSD New Mexico's first public school, is to provide for the unique needs of the children and students who are deaf/hard of hearing, their families, and professional partners by providing a comprehensive array of school and statewide programs.

As a statewide service agency, NMSD collaborates with families, school districts, agencies and communities throughout the state to meet the critical language, communication, and learning needs of children and students in New Mexico who are deaf/hard of hearing, birth trough high school.

As a school, NMSD provides an American sign Language and English bilingual learning environment that includes direct, ongoing access to language and communication in and out of the classroom with a wide range of peers, and adults. The students are interactive learners who receive dynamic high quality standards-based instruction in a variety of curricular and extra-curricular activities.

Toddler, Pre-K, and K-12 Services

Are on it's main Campus in Santa Fe With Standards based Curriculum, staff Specially trained to educate deaf and hard of hearing children, and a full array of related services including audiology, speech language pathology, ASL, nursing, interpreting, social work and occupational therapy. Students Participate in a whde array of sports, clubs and academic extracurricular activities such as Academic Bowl and Battle of the Books.

Satellite Preschool

In Gallup, Las Cruces, Farmington, and Albuquerque in collaboration with local school districts and following New Mexico Early Learning Guidelines. Teachers are trained in the principles of early childhood development through a Reggio Enilia Approach. NMSD boasts one of the exemplary programs for deaf preschoolers in the coutry that uses this philosophy.

Early Intervention

Services provided statewide in local communities serving babies and young children ages 0 – 6 and their families through Parent Infant Child and Deaf Mentor Programs providing essential supports for early learning of language and overall development.

Outreach, Training, and Consultation

Services to public schools and families statewide. Services include educational consultation with school district staff and families, ASL service corps providing ASL instruction, and district/regional and statewide workshops and events.

Instructional Strategies and Assessments

Data-driven instruction is essential in determining a student's strengths and needs and in determining not only the content that needs to be taught but the instructional strategies that should be used. NMSD's teachers regularly engage students in ongoing assessment activities that are designed to inform instruction. Yearly and short-cycle assessments are also used to evaluate NMSD students' progress.

Arts Education

Technology and the Arts are highly valued at NMSD. NMSD believes in providing students with every opportunity to incorporate their own cultural values through art as well as learn about the cultures of others. Another core belief is in freedom of expression through a variety of mediums and allowing NMSD's Deaf and hard of hearing students multiple ways to communicate through the Arts.

Adult Education Division

The Adult Education Division oversees the provision of targeted educational services outlined by the Adult Education and Family Literacy Act (AEFLA), Title II of the federal Workforce Innovation and Opportunity Act. Adult education and literacy programs are recognized nationwide as both an important public service and a robust economic catalyst. During fiscal year 2017-2018, the Adult Education Division served a total of 12,227 students, supported by \$5,235,900 in state funding and \$4, 279,774 in federal funding from the U.S. Department of Education. Conservatively calculated without including public assistance savings or increased tax revenue, *New Mexico received a 535% return on its investment.*

1,153 students unemployed at entry entered the workforce and generated \$16,948,750 in wages after the second quarter of exiting program. Source: Department Workforce Solutions & LACES

839 HSE graduates, \$7,853,040 Estimated earnings (\$180.00 additional weekly earnings x 839 graduates x 52 weeks)

Source: Bureau of Labor, U.S. Department of Labor and LACES

847 transitioning to college or vocational training with increased earnings of \$3,215,212 (\$73.00 additional weekly earnings x 847 transitioning x 52 weeks) Source: Bureau of Labor Statistics, U.S. Department of Labor and eDEAR.

\$16,948,750 + \$7,853,040 + \$3,215,212 = \$28,017,002 (FY17-18 RETURN) / \$5,235,900 (FY 17-18 State Investment) =

535% ROI

ADULT EDUCATION HELPS NEW MEXICANS

- Strengthen foundational literacy and numeracy skills
- Earn a High School Equivalency Credential (HSE)
- Learn English as a second language (ESL) and civics
- Strengthen workplace readiness and "soft skills"
- Participate in workplace and apprenticeship training
- Transition to postsecondary education
- Develop sustainable career pathways
- Help children succeed, in and out of school
- Break generational cycles of low literacy and poverty

The adult education system includes 24 subgrantee program providers across New Mexico offering free instruction and training to eligible adults, including dislocated workers and out-of-school youth ages 16-18. Most of these providers are postsecondary institutions. All adult education program participants are in need of core skill development; most lack a high school diploma or equivalent and have multiple barriers to supporting themselves and their families. For adults with low literacy levels, securing meaningful employment with a family-sustaining wage, effectively participating in their children's education, accessing community services, and informed civic engagement can be a challenge. In collaboration with core partners, the Adult Education Division works to address these needs for the benefit of all New Mexicans.

Capital Projects Division

Over the past two years the New Mexico Higher Education Department's Capital Projects Division has made significant improvements to the processes and standards required by the department for managing capital outlay. With these improvements the Division has increased its ability to collaborate with institutions while maintaining the responsibilities of an oversight agency.

The Capital Projects Division established clear guidance for New Mexico's publicly funded colleges and universities through annual Capital Project trainings. These trainings covered all aspects of the capital outlay process from the Department's yearly Capital Projects hearings to the processing of financial draws from the State Board of Finance. Attendance at these yearly trainings has ranged from 70 participants in 2017 to 96 in 2018. Participants include business office staff, plant operations staff, purchasing staff, as well as presidents from institutions. These trainings increased awareness and has ensured that all institutions are managing and reporting their capital outlay appropriations in accordance with the requirements.

To enhance accountability and streamline procedures, the Capital Projects Division made revisions to the existing yearly Capital Projects summer hearing and monthly Capital Project Transmittal forms. Collaboration between the Department and the institutions allowed for these form revisions which gave institutions the opportunity to better articulate how the project supported the established criteria used to evaluate projects. These revisions also allowed for a more efficient and well defined process for the Department's yearly Capital Projects hearings and the Capital Projects monthly hearings, giving the committee more pragmatic information in a simplified format for review. The Capital Projects Division implemented a net-zero square footage initiative. This initiative calls for institutions to offset any new I&G square footage by razing an equal amount of square footage on campus. This initiative has prompted several institutions to formally commit to a baseline campus square footage total and to the square footage offset of several new buildings around the state.

The Capital Projects Division also manages the day-to-day aspects of the higher education capital outlay program, which includes the establishment of grant agreements between the Department and its grantees, monitoring of the grant agreement requirements, processing of financial draws through the State Board of Finance, the organization of monthly Higher Education Capital Outlay Committee hearings, and the organization of the Higher Education Capital Outlay Summer hearings. The division also is responsible for analyzing and communicating all directives from the Executive, other state agencies, or the Legislature involving capital outlay.

In Fiscal Year 2018, \$126.8 million in projects were presented to the Capital Outlay Committee during the Summer Hearings. \$269.8 million in projects were heard during monthly Capital Outlay Committee hearings. Part of the \$269.8 million in projects heard included projects appropriated through the 2014 and 2016 General Obligation (GO) Bonds totaling \$47.5 million and \$2.72 million in 2015 and 2016 Severance Tax Bonds. Approximately 80% of the 2016 GO Bond projects have been heard and approved by the Higher Education Department.

Passage of the 2018 General Obligation Bond by the voters in November of 2018 will provide an additional \$128 million to the institutions of Higher Education in the state. This funding will be managed through the department's capital outlay program. Exhibit A provides a breakdown of the institutions, their respective projects, and the appropriated funding.

Exhibit B provides information on the active projects being managed by the departments Capital Projects Division.

Legislative Lottery Tuition Scholarship

The Legislative Lottery Tuition Scholarship (Lottery Scholarship) is to provide tuition assistance for higher education students pursuant to the Legislative Lottery Tuition Scholarship Act. In FY 2018, the Lottery Scholarship paid 60% of sector average tuition.

In FY18, there were a total of 26,123 Lottery Scholarship recipients distributed by sector as follows:

- 18,650 recipients at the research institutions;
- 2,344 recipients at the four-year comprehensive colleges; and
- 5,129 recipients at the two-year independent and branch community colleges.

The table below depicts FY18 enrollment data and the number of lottery recipients for each institutions (grouped by sector). The percentage of Lottery Scholarship recipients is highest at the Research institutions, followed by the Comprehensive universities, with the lowest percentage of students receiving Lottery Scholarships within the Community College sector (two-year institutions).

GEAR UP New Mexico

Overview

In 2012, the U.S. Department of Education awarded the New Mexico Higher Education Department (NMHED) a total of \$33.9 million over seven years (\$4.8 million annually) to fund **G**aining **E**arly **A**wareness and **R**eadiness for **U**ndergraduate **P**rograms (GEAR UP). Having just begun its seventh and final year, GEAR UP New Mexico (or GEAR UP NM) is designed to increase the number of students graduating from high school and enrolling in post-secondary education and/or training without the need for remediation. The grant follows a priority model, the focus of which is to serve 7th – 12th grade students, as well as first-year college students who graduated from GEAR UP New Mexico high schools. GEAR UP NM has annually served over 10,000 middle and high school students in 24 schools in 11 school districts and over 500 first-year college students at post-secondary institutions throughout the state.

GEAR UP's purpose is to increase college-access opportunities for under-represented, low-income, minority, and first -generation college-going students. Racial and economic disparities have posed significant barriers historically to enrollment in higher education, effectively limiting opportunity for generations of students. GEAR UP NM equips students and their families with the skills and knowledge to overcome these obstacles by providing them various academic supports and financial aid and academic readiness awareness, as well as teaching students non-cognitive skills (such as self-efficacy, self-determination, and self-advocacy) critical to post-secondary success. GEAR UP NM also seeks to foster a richer college-going culture through support of school-based models that fill identifiable gaps in services, enrich existing ones, and bring about sustainable change through implementation of replicable programs to meet the unique and varied needs of students, staff, families, and their local communities, supports that are aligned with specific goals in the Educational Plan for Student Success (EPSS) and School Report Cards set forth by the New Mexico Public Education Department (NMPED).

Currently in its seventh and final year, GEAR UP NM continues to serve roughly 10,000 middle and high school students annually in the following districts: Bernalillo Public Schools, Central Consolidated School District, Grants-Cibola County Schools, Jemez Mountain Public Schools, Jemez Valley School District, Los Lunas Public Schools, Mora Independent Schools, Pecos Independent School District, Penasco Independent School District, Santa Fe Public Schools, and Walatowa High Charter Schools. Each Partner District has signed NMHED's GEAR UP Grant Agreement, which outlines its legal obligation to deliver and uphold required grant objectives and deliverables.

GEAR UP NM: Student Demographics

GEAR UP NM students reside in communities rich in culture, history, and tradition and reflective of the state's historically tri-partite ethnic composition. 58% of our students identified as Hispanic, 29% as Native American, and 12% as Caucasian. In addition, the sizeable Native American population consists of students of varied tribal backgrounds, primarily Navajo and a number of culturally-distinct Pueblos. Just over 85% of GEAR UP NM students qualified for Free/Reduced Lunch status.

GEAR UP NM students come from communities ranging in size from Gallina, population 286, to Santa Fe with a population of 84,099, and with median household incomes spanning a high of \$51,635 in Los Lunas to a low of \$27,654 in Peñasco. Two communities, Cochiti Pueblo and Peñasco, have median incomes below \$30,000, while annual income levels at five others remain under \$40,000. The only locales where median household income exceeds \$50,000 are Los Lunas and Santa Fe (both of which are slightly above the state average of \$45,524).

GEAR UP NM: Service Delivery

GEAR UP NM programs and services have been designed to meet the following four objectives:

- •improve students' academic performance and preparation for post-secondary education;
- •increase high school graduation and post-secondary enrollment rates;
- •augment students' and their families' knowledge of post-secondary options, readiness, and financing; and •foster in partner districts systemic and sustainable change, supportive of continued efforts to increase students' preparation for college and career success.

GEAR UP NM funds have allowed partner districts to conduct college visits, administer comprehensive financial planning activities with families, coordinate transition programs for rising 9th graders, offer tutoring, ACT test prep, credit recovery, and dual credit, and provide meaningful summer enrichment programs focused on college and career readiness.

¹These statistics come from the 2016 American Community Survey administered annually by the US Census Bureau.

Underlying this range of services are GUNM's core pillars—an embedded literacy intervention, a College and Career Readiness system (CCRS), and opportunities to develop student leadership.

GEAR UP NM funds literacy intervention classes for students identified as "nearing proficient" in Reading in each of its partner districts. These classes utilize a research-based reading program, targeting vocabulary development, text structure, and comprehension strategies to help students score proficient on the state-mandated PARCC assessment and to prepare students for success in their core English and other content area classes, allowing them to remain on-track to graduate. GEAR UP NM has articulated structured and measurable "standards of practice" to outline more explicitly state-level expectations for each literacy intervention program in its partner districts. In 2016-17, GEAR UP NM also expanded its funding for intervention services to include Math instruction in four districts where student achievement data demonstrated such a need.

GEAR UP NM, through its support for CCRS, enables partner districts to increase the rigor of their course offerings and assist students in acquiring the academic skills and self-efficacy behaviors necessary to successfully navigate post -secondary studies. Six districts use AVID as their CCRS, two implement the Model schools framework from the International Center for Leadership in Education (ICLE), while three have developed their own locally-grown college readiness system. Each district's CCRS adheres to a set of well-defined, measurable elements (adapted in part from the National High School Center, based at the American Institutes for Research) that encompasses instruction, assessment, professional development, and sustainability, while lending greater structure and accountability for school-wide implementation. GEAR UP NM's support for these CCR systems is designed to increase the level of rigor (or cognitive demand) of instruction, foster a "college-going" culture, and better prepare students for post-secondary studies, while also representing a powerful means of institutional change.

A key feature in GEAR UP NM's annual programming is its statewide coordination of a suite of college readiness campaigns (supported by numerous partnerships as well as extensive outreach and promotional materials) that follows the trajectory of students' evolving college-access needs through their final two years of high school. Students at each Partner District will participate in this cycle of college bus tours to diverse HEIs throughout the state, followed by participation in ACT testing and College Application Week, FAFSA completion, and culminating in a senior year College Signing Day. These campaigns expose students more deeply to a broad spectrum of the college experience, offer students and families targeted assistance in navigating the process of post-secondary matriculation, and nurture the growth of "college-going" cohorts among GEAR UP NM students throughout the state.

To that end, GEAR UP NM also put on an annual Student Leadership Conference, designed to raise college and career expectations while developing leadership skills. Twelve students from each district attend this conference, learning and applying skills in an effort to develop as leaders, serve as mentors to other students, and nurture the creation of sustainable mentoring and service leadership programs.

GEAR UP NM: Outcomes

Over the length of the grant, GEAR UP NM has achieved steady annual increases in a number of critical college readiness outcomes. Participation in College Application Week grew significantly during the grant with over 66% of GEAR UP NM seniors participating in 2017. More critically, the average number of applications per student rose steadily from 1.5 in 2014, to 2.3 in 2015, to 2.6 in 2016. In 2017, the majority of students filled out at least 3 applications. Also, the *FAFSA Before March* 1st completion rates for GEAR UP NM students improved appreciably year to year, rising from 22% in 2014-15, the first year of tracking, to 24% the following year, 31% in 2016-17, and 44% in 2017-18, surpassing the state's overall rate for the first time. GEAR UP NM also met growth goals each year for all GPRA indicators measured by quantifiable student outcomes (i.e., passing rates, graduation rate, post-secondary enrollment, and placement without remediation). Perhaps most significantly, the four-year cohort graduation rate for GEAR UP NM high schools also rose annually from a 2012 baseline of 63% to 80.4% in 2017, the most recent year of data, while these schools' post-secondary enrollment rates over the same period also increased from 42% to nearly 55%, exceeding state averages. From 2012 to 2017, the state's cohort graduation rate increased from 63% to 71%, while graduation rates at GEAR UP NM high schools posting 5 percentage point increases in post-secondary enrollment rates in the past two years, while the state, as a whole, remained stagnant.

In addition to collecting, analyzing, and reporting a large range of quantitative data annually, GEAR UP NM has also utilized various types of qualitative data, including surveys and focus groups, for feedback and program improvement. GEAR UP NM has also used the medium of film as its most recent means of providing a more comprehensive perspective through the use of qualitative data. Over the past two years, GEAR UP NM has partnered with LittleGlobe, a local film-making company, to create a student-led film titled *GEAR UP Is All About U!*, shedding light on the critical impact that this college access grant has had on New Mexico's students and families (to view the two individual films, go to: https://www.youtube.com/watch?v=I9d_XTU1IQ4&t=294s AND <a href="https://www.y

²The data above reflect the student outcome measures on which all GEAR UP grants nationally must report as part of the Government Performance Results Act (GPRA) and reflect what has been required to report thus far (through SY 2016-17). The data for the subsequent year will be reported in April, 2019 when GEAR UP NM will submit its Annual Performance Report (APR) to the U.S. Department of Education (followed by the Final Performance Report in Fall, 2019, when the summative data from all seven years will be reported).

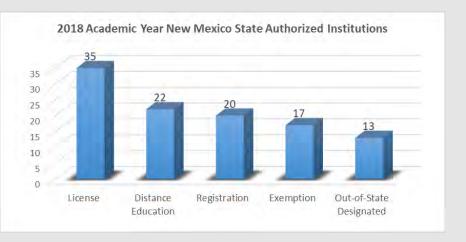

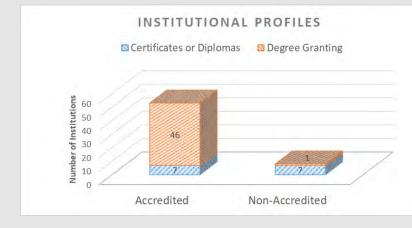

Private Post-Secondary Division

The Private Post-Secondary Schools Division (PPSD) protects students and consumers through the oversight and regulation of New Mexico's Private Post-Secondary Educational Institutions Act. The New Mexico Private Post-Secondary Educational Institution Act requires that institutions submit an Annual Report as part of the ongoing compliance program. The Annual Report is due by December 1 of each year, and is required to include specific information related to the educational programs offered by the institution in the reporting period.

State Authorized Institutions

There were 67 private post-secondary state authorized institutions (35 licenses, 22 distance education licenses and 20 registrations) that were required to submit a 2018 Annual Report to PPSD, of which 61 submitted Annual Reports online prior to the deadline. These institutions enrolled approximately 10,240 New Mexico students. For the institutions that submitted within the Division's deadlines, the Division was able to draw some conclusions about the sector. The information contained in this Annual Report is based on self-reported data from reporting institutions; the information has not been independently verified by the

Institutional Profiles

The following graph shows the 61 state authorized private post-secondary institutions broken down by certificate/diploma versus degree and separated by accredited and non-accredited. There are 53 (87%) institutions that are accredited through an accrediting agency recognized by the United States Department of Education. Of the 53 accredited institutions, 7 are issuing certificates or diplomas and 46 institutions are degreegranting. The remaining 8 institutions are nonaccredited of which 7 institutions are not degreegranting and one institution is degree-granting and currently applying for national accreditation.

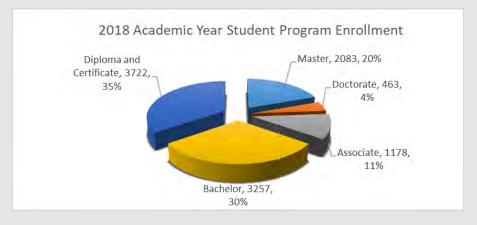

Student program enrollment in academic year 2018 for private post-secondary institutions with a physical presence in New Mexico, whose accreditor was either national or specialized or none, revealed a 71% enrollment in diploma and certificate programs and a combined 29% enrollment in degree programs.

Student program enrollment in regionally accredited private post-secondary institutions with a physical presence in New Mexico showed an 84% enrollment in either Bachelor or Master degree programs and only a combined 15% enrollment in diploma and certificate programs.

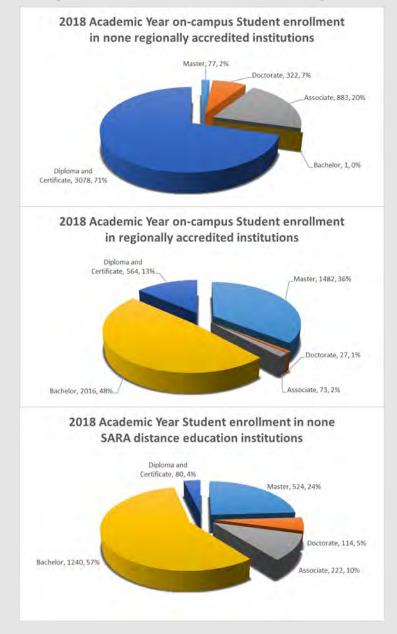

Private post-secondary Institutions operating under the Interstate Distance Education Act with no physical presence in New Mexico that were not NC-SARA approved revealed a 57% student enrollment in Bachelor degree programs and a 24% student enrollment in Master degree programs. Only a combined 4% of students enrolled in diploma and certificate programs, and only 5% enrolled in Doctorate degree programs.

Student Program Enrollment Counts

Of the 10,240 enrolled students in private post-secondary institution, the majority (3,722) were enrolled in diploma and/ or certificate programs. The types of diplomas and certificate programs offered by these institutions ran the gamut, and included such programs as cosmetology, vocational nursing, truck driving, and computer training. In academic year 2018, 30 percent of students were enrolled in bachelor programs, and a combined 24 percent were enrolled in graduate -level degree programs.

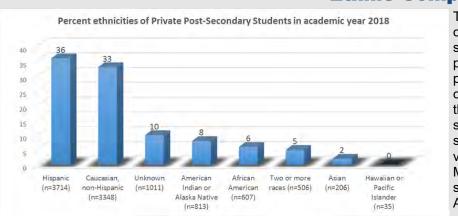

Student Program Enrollment Counts by Institution Type

On-time Graduation

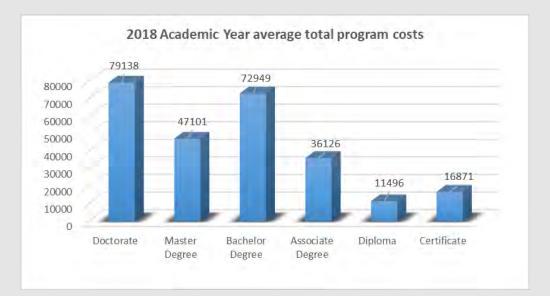

The 61 institutions that submitted an online Annual Report prior to the deadline with readily available on-time graduation rates for the cohort of 2018 reported a combined on-time graduation rate of 66%. The on-time graduation rate was derived from a 25% institutional reporting rate.

The graph to the left depicts the ethnic composition of the 2018 academic year student body enrolled in State authorized private post-secondary institutions. All percentages follow roughly statewide percentages of New Mexico residents with the exception of African Americans who showed a 607 enrolled count or 6% of all student enrolled in state authorized private post-secondary institutions in New Mexico. This percentage is triple the statewide percentage of 2% of African American residents in New Mexico.

Average Total Program Costs

The chart below shows the average total program cost by New Mexico State Authorized institutions. A Bachelor Degree obtained by a private post-secondary institution that is State Authorized in New Mexico will cost on average \$18,237 per academic year, assuming a four year completion time.

Implementation of New and Amended Rules in AY 2018

In Academic Year 2018, the Department has repealed 5.100.2 NMAC, Private Post-Secondary Institutions Operating under the Post-Secondary Educational Institution Act and 5.100.4 NMAC, Advisory Committee for Private Post-Secondary Education as well as 5.100.3 NMAC, Private Post-Secondary Institutions Operating under the Out-Of-State Proprietary School Act. These three rules were replaced by four new rules, which distinguish the differences between registration, licensing, exemptions from the act, and closures of all post-secondary educational institutions in New Mexico. The new rules provide for the registration of all regionally accredited colleges and universities and licensure of all career schools and all non-regionally accredited colleges and universities operating in the state pursuant to the Post-Secondary Education Act) the Department implemented new rule 5.99.1 NMAC, Public and Private Post-Secondary Institutions to become authorized as distance education providers for New Mexico students to receive educational services from an institution with no physical presence in the state. It also allows for a process to authorize accredited institutions with a physical presence in New Mexico to provide distance education to students living in other states.

Ethnic Composition of Student Body

Proposed New and Amended Rules for AY 2019

5.99.1 NMAC, PUBLIC AND PRIVATE POST-SECONDARY INSTITUTIONS OPERATING UNDER THE INTERSTATE DISTANCE EDUCATION ACT:

The proposed rule replacement applies to public and private post-secondary institutions offering distance education to any student within New Mexico and the provision of distance education by participating New Mexico post-secondary educational institutions to students in other states, unless the institution is expressly exempted by the department. The rule provides oversight, general standards and application requirements for distance education authorization. Every post-secondary educational institution offering distance education from New Mexico or to students in New Mexico shall be subject to the oversight, standards and applications requirements set out in the proposed rule. The proposed rule replacement provides a list which clarifies activities that trigger a post-secondary institution to have a physical presence under the Post-Secondary Educational Institution Act, which may require the institution to obtain additional or alternate authorization, beyond distance education authorization. The proposed rule replacement also provides a list of activities that do not trigger a physical presence in New Mexico. Provisions regarding supervised field experience under distance education authorization have been included to address regulation of students participating in learning activity through practica, student teaching, clinical placements, research, internships, or other similar placements. Additional provisions related to complaint procedures have been included. The proposed rule replacement retains many provisions from the proposed repeal version of 5.99.1 NMAC, but seeks to provide clarification through changes in definitions, section reorganization, and addition of new provisions.

5.99.2 NMAC, CLOSURE OF A DISTANCE EDUCATION INSTITUTION:

The department proposes adoption of new rule 5.99.2 NMAC. The new proposed rule provides oversight, standards, regulations, and the administrative process for institutions that seek to cease operations or offerings or permanently close, and are providing distance education pursuant to the Interstate Distance Education Act. The new rule establishes requirements for notices, plans, reports, procedures and standards related to teach-out agreements, and student records.

5.100.5 NMAC, EXEMPTION UNDER THE POST-SECONDARY EDUCATIONAL INSTITUTION ACT:

The purpose of the proposed rule change is to update the definition of physical presence and to provide a more comprehensive list of activities that trigger a post-secondary institution to have a physical presence under the Post-Secondary Educational Institution Act. The proposed amendment also provides a more comprehensive list of activities that do not trigger a physical presence in New Mexico. Definitions have been updated to provide additional clarity. Statutory and administrative code citation have been added within the text of the rule to provide more specificity. Grammatical and stylistic changes have been made throughout.

5.100.6 NMAC, REGISTRATION UNDER THE POST-SECONDARY EDUCATIONAL INSTITUTION ACT:

The purpose of the proposed rule change is to update the definition of physical presence and to provide a more comprehensive list of activities that trigger a post-secondary institution to have a physical presence under the Post-Secondary Educational Institution Act. The proposed amendment also provides a more comprehensive list of activities that do not trigger a physical presence in New Mexico. Definitions have been updated to provide additional clarity. Grammatical and stylistic changes have been made throughout. Institutional records maintenance and retention policy requirements have been modified to include compliance with the laws of other oversight entities.

5.100.7 NMAC, LICENSURE UNDER THE POST-SECONDARY EDUCATIONAL INSTITUTION ACT:

The purpose of the proposed rule change is to update the definition of physical presence and to provide a more comprehensive list of activities that trigger a post-secondary institution to have a physical presence under the Post-Secondary Educational Institution Act. The proposed amendment also provides a more comprehensive list of activities that do not trigger a physical presence in New Mexico. Definitions have been updated to provide additional clarity. Grammatical and stylistic changes have been made throughout. Institutional records maintenance and retention policy requirements have been modified to include compliance with the laws of other oversight entities.

5.100.8 NMAC, CLOSURE OR SUBSTANTIAL CHANGE TO LOCATION UNDER THE POST-SECONDARY

EDUCATIONAL INSTITUTION ACT:

The purpose of the proposed rule change is to clarify regulations through additional specificity. The proposed amendment updates the definition of physical presence to provide consistency with the proposed amendments to the definition in 5.100.5 NMAC, 5.100.6 NMAC, and 5.100.7 NMAC. The amendment seeks to delineate the types of records that must be provided to the custodian of records, based upon whether the institution has State Authorization pursuant to 5.100.6 NMAC or 5.100.7 NMAC, been granted express exemption pursuant to Section 21-23-4 NMSA 1978 and 5.100.5 NMAC, or has not operated lawfully pursuant to the Post-Secondary Educational Institution Act. The amend-

New Online State Authorization Application platform

The Private Post-Secondary Schools Division is in the process of implementing a new online application platform for State Authorization renewals and for new State Authorization applications. The platform should be functional and available in January of 2019, with online admission and application fee payments available by summer 2019.

PPSD Planned Developments for 2019

The Private Post-Secondary Schools Division plans to develop and execute a compliance check procedure to hold institutions accountable from digressing form compliance with the Post-Secondary Educational Institution Act. The division is also developing a plan that will identify private post-secondary institutions that are operating in New Mexico without State Authorization. A comprehensive plan will be developed in the first quarter of 2019.

Schools that Closed in Academic Year 2018

The Division works closely with schools as they close their doors to ensure there is a long term plan in place for maintenance and access of records and to ensure the enrollment agreements are fulfilled. During the 2018 academic year, the following schools have closed:

> Brown Mackie College, Albuquerque (*closed in December of 2017*) American Century University (*closed in May of 2018*) Santa Fe University of Arts and Design (*closed in May of 2018*)

A comprehensive list of all previously closed schools with information about the custodian of records can be found under the Student Transcript requests at: <u>https://ppsd.smapply.io/</u>

Locations of State Authorized Institutions in New Mexico

Common Course Numbering

<u>Post-secondary Education Articulation Act</u> was initially passed in 1995 and charged the New Mexico Higher Education Department (NMHED) with creating a statewide articulation plan. The plan was further defined in 2005 as a common course numbering system created by NMHED in consultation with faculty. During the 2015 regular legislative session, the Post-secondary Education Articulation Act was modified to include the deadline of August 2017 for completion of the common course numbering system.

During 2015, NMHED set up an articulation and transfer steering committee to oversee the implementation of the common course numbering system. The committee developed an implementation plan, oversaw the faculty committee work, and created a publicly available, online crosswalk.

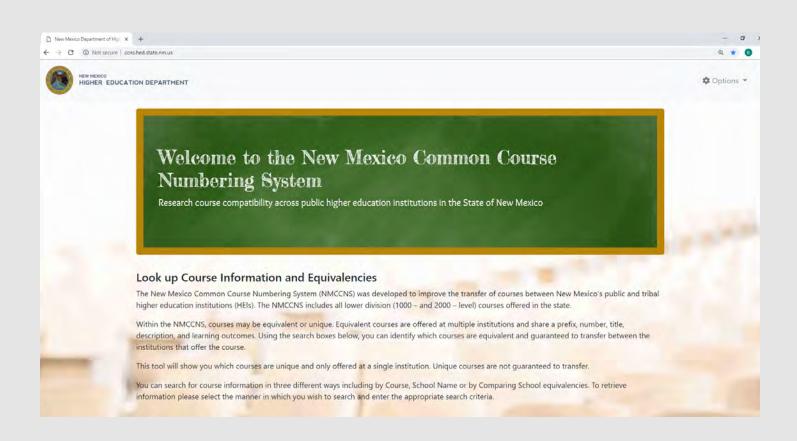

The goal of the common course numbering system is to improve transfer and articulation of courses between New Mexico's public higher education institutions (HEIs).

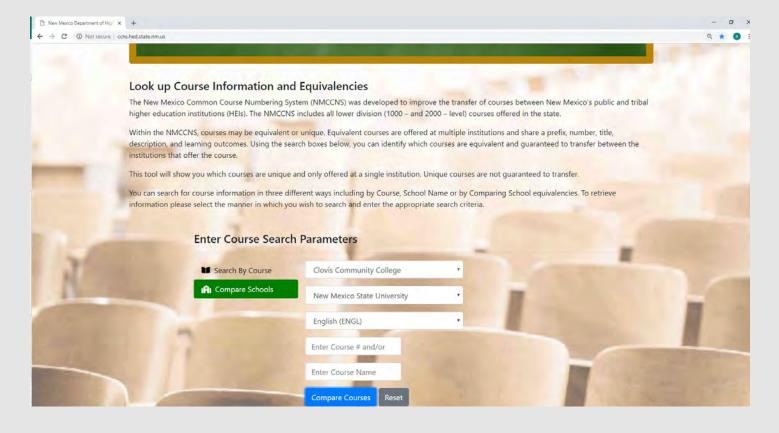

Equivalent courses will transfer between New Mexico's public HEIs as the course with the same number. Transferred equivalent courses shall fulfill degree requirements of a student's chosen academic program at the receiving institution *if* it is part of his or her degree plan. Equivalent courses that are not part of a student's chosen degree requirements ments may not fulfill degree requirements.

New Mexico Administrative Code (NMAC) 5.55.5, which outlines how the common course numbering system will be maintained and how courses will transfer between institutions, went into effect on June 12, 2018.

Online Crosswalk

In August of 2018, NMHED created an online crosswalk, which is available at http://ccns.hed.state.nm.us/.

Maintenance of the Common Course Numbering System

NMHED is entering the maintenance phase of the common course numbering system. During this time, institutions can request changes be made to the common course numbering system by submitting the appropriate application (add, remove, reclassify, change course descriptions, change SLOs) to NMHED. NMHED staff <u>or</u> the New Mexico Curriculum & Articulation Committee (NMCAC) will review and approve applications depending on the type of request. In February 2019, NMHED will implement a dynamic application system, which will streamline the workflow of reviewing and approving changes to the common course numbering system.

General Education

The Post-Secondary Education Articulation Act requires the creation of a statewide general education curriculum.

The "statewide general education core curriculum shall include a comprehensive array of lower-division college-level courses designed to provide a foundation for a liberal education and courses that include the interdisciplinary study of differences that recognize and respect New Mexico's diverse cultures, histories and identities. The department shall develop a process for maintaining and updating the statewide general education core curriculum. The department shall review and approve proposed statewide general education core curriculum requirements."

The process for reviewing and approving general education courses is detailed in <u>5.55.6 NMAC</u>, which went into effect on June 12, 2018. **Table 1. New General Education Models**

General Education Committee

A faculty committee led by Dr. Dan Howard, NMSU's former Provost, developed **a new model of General Education that is designed to develop the essential skills that all college graduates need for success**. The committee, which was comprised of faculty and administrators, met for 2 years beginning in early 2016.

General Education Models

The General Education Committee developed and recommended the model for Associate and Bachelor degrees to NMHED (Table 1), which subsequently adopted them. NMHED developed a

model for Applied Associate degrees based on the model recommended by the committee. The new General Education models must be adopted by all of New Mexico's public higher education institutions by **August 1, 2019**.

Essential Skills

The new general education model is designed to develop the essential skills that all college graduates need for success in higher education and careers: communication, critical thinking, quantitative reasoning, information & digital literacy, and personal & social responsibility. Three essential skills are associated with each of six content areas, as shown in the table below. Courses within each content area will develop the three related essential skills (Table 2) while also addressing content and skills associated with the particular course.

| General Education Content Area | Skills Associated with the Content Areas | | | |
|-----------------------------------|---|--|--|--|
| Communications | Communication, Critical Thinking, Information & Digital Literacy | | | |
| Mathematics | Communication, Critical Thinking, Quantitative Reasoning | | | |
| Science | Critical Thinking, Personal & Social Responsibility, Quantitative Reasoning | | | |
| Social & Behavioral Sciences | Communication, Critical Thinking, Personal & Social Responsibility | | | |
| Humanities | Critical Thinking, Information & Digital Literacy, Personal & Social Responsibility | | | |
| Creative and Fine Arts | Communication, Critical Thinking, Personal & Social Responsibility | | | |

Table 2. Essential Skills Related to Content Areas

Grace Period for Previously Approved General Education Courses

Courses that were approved to be part of the previous General Education Curriculum will be included in the new model of general education with the understanding that they will be re-certified for essential skills by **Fall 2020**. If a course is not re-certified by Fall 2020, it will be removed from the General Education Curriculum. A list of approved general education courses under the old and new models can be found on the NMHED website.

Certifying General Education Courses

To certify or re-certify a general education course, an institution must submit a completed certification form, sample assessment, and optional rubric. The form includes 3 narratives addressing how the course (as a whole) develops and assesses the essential skills. Completed certification forms are reviewed by the New Mexico Curriculum and Articulation Committee (NMCAC) four times a year. The committee decisions are sent to NMCAC members, Chief Academic Officers, and the New Mexico Association of Collegiate Registrars and Admissions Officers.

NMHED and NMCAC have begun the process of certifying and re-certifying courses under the new model of General education. A dynamic application process will be implemented in February 2019, which will streamline the workflow of reviewing and approving new General Education courses.

Degree Mapping/Meta-majors

The <u>Post-secondary Education Articulation Act</u> charges the Higher Education Department with developing and maintaining meta-majors and transfer modules. <u>5.55.7 NMAC</u> explains the process for developing meta-majors in detail.

The department is working with each institution to develop term-by-term degree maps based on the requirements of current, approved undergraduate degree and certificate programs offered at institutions in New Mexico. A term-by-term degree map provides college students with a clear and direct path to on-time completion. The term-by-term degree maps will be completed in **Fall 2018**.

Degree maps will provide students with a list of the courses required for their chosen degree and the order in which those courses should be taken in order to graduate on time.

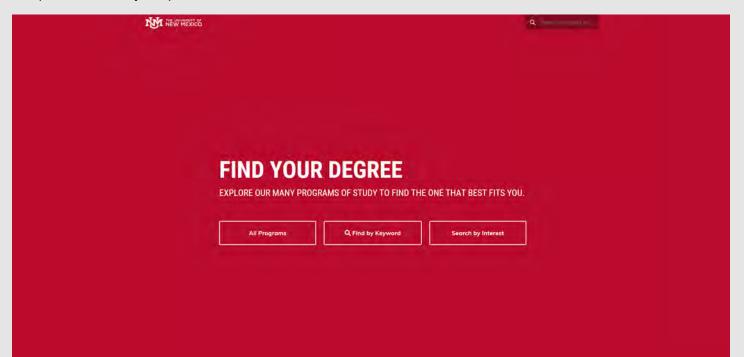

Implementation Plan

The Institute of Design & Innovation, as part of the degree mapping research from UNM's Research and Public Service Project (RPSP) entitled "Degree Plans: Roadmaps for Higher Education in New Mexico", has developed a curriculum editor that allows institutions to upload the academic structure of their institution, curricular information (course names and descriptions), and degree requirements and then builds degree maps (see UNM example below). Most institutions have nearly completed uploading their curriculum and degree requirements into the curriculum editor.

Beginning in Fall 2018, the term-by-term degree maps will be analyzed to formulate statewide meta-majors, which consists of lower division courses that articulate to multiple undergraduate programs in related disciplines and will be transferable between institutions. After meta-majors have been calculated, they will be presented to the <u>NMCAC</u> for review.

Maintenance of Degree Maps

Any change to an institution's academic structure, curricular information (course names and descriptions), and degree requirements should be reported to NMHED within 30 business days of implementation in order to keep the degree maps and meta-majors up-to-date.

Degree Review and Approval

Graduate Degree Programs

Graduate programs proposed by New Mexico's public universities must be approved by the NMHED and by the New Mexico state board of finance after being approved through the institution's own internal process and the New Mexico Council of Graduate Deans (NMGCD). After a proposed program is approved by NMCGD, a Graduate Program Application is submitted to NMHED.

NMHED staff will review submitted applications and present them to the <u>New Mexico Higher Education Advisory Com-</u> <u>mittee</u> (NMHEAC) for consideration. The NMHEAC will recommend that the Cabinet Secretary either approve, disapprove, or return the application to the submitting higher education institution for modification. The Cabinet Secretary will consider the recommendation and determine whether or not the program will be presented at the next New Mexico state board of finance (BOF) meeting. If a program is presented to the BOF and approved, the program will be assigned a CIP code and the institution may begin enrolling students in the program. During 2018, five Graduate Programs were reviewed and approved:

- 1. University of New Mexico Master of Arts Program in Native American Studies
- 2. Western New Mexico University Master of Nursing and Post-Master Family Nurse Practitioner Certificate
- 3. New Mexico State University Doctorate of Philosophy Program in School Psychology
- 4. New Mexico State University Professional Master's Degree Program in Computational Data Analytics
- 5. University of New Mexico Master of Arts Degree and the Doctorate of Philosophy in Chicana and Chicano Studies

Undergraduate Degree Programs

NMHED began reviewing all new state-funded <u>associate</u> and <u>bachelor</u> degrees in Fall 2018. The review and approval process is outlined in <u>5.5.6 NMAC</u>, which went into effect June 12, 2018.

All associate and bachelor degree programs that <u>begin</u> the institutional approval process after **August 1, 2018** must be reviewed and approved by the NMHED. The institutional and NMHED review processes may occur simultaneously.

The NMHED approval process begins with submission of the Undergraduate Program Application. Applications on or before the submission deadline will be presented at the next New Mexico Higher Education Advisory Committee (NMHEAC) meeting. The NMHEAC will recommend to the Cabinet Secretary to either approve, disapprove, or return the application for modification. The Cabinet Secretary will consider the NMHEAC's recommendation and issue a determination to the proposing institution within 10 business days of the NMHEAC meeting.

After the NMHED Cabinet Secretary **and** the institution's Governing Board approve a proposed program, the program will be assigned a CIP code and the institution may enroll students in the program.

Reporting Undergraduate Program Changes

New undergraduate programs; new sub-baccalaureate certificate programs; discontinued undergraduate programs; and any changes to the curriculum of an existing undergraduate program must be reported to NMHED within 30 business days of implementation via the degree mapping curriculum editor (see degree mapping above) in order to maintain an up-to-date inventory of programs offered by New Mexico's public higher education institutions.

- New Mexico Junior College
- New Mexico Military Institute
- San Juan College
- Santa Fe Community College

Federal Institutions

Institute of Education Sciences (IES)

The statistics, research, and evaluation arm of the U.S. Department of Education

National Center for Education Statistics (NCES)

The primary federal entity for collecting and analyzing data related to education Part of the Institute for Education Sciences within the United States Department of Education

IPEDS (Integrated Postsecondary Education Data System)

A system of interrelated surveys conducted annually by the NCES

Awards AY 16-17 Graduate Degree

A degree granted after completing the requirements of a post-bachelor's course of study

Professional Degree

Reported exclusively for UNM HSC

Bachelor's Degree

A degree granted after completing the requirements of a four-year, post-secondary course of study

Associate's Degree

A degree granted after completing the requirements of a two-year, postsecondary course of study

Certificate

A non-degree credential awarded for the successful completion of a defined course of study Awards may be made at the undergraduate or graduate level

Student Counts AY 17-18 (Summer & Fall 17, Spring 18)

Distinct Headcount

• Number of individual students enrolled in a HEI for a semester

Full-time Equivalents

- Total number of SCHs all students are enrolled in during the Fall semester
- Divided by 15 for undergraduate students (the number of SCHs required to meet the "Full-time" criteria for on-time graduation)
- Divided by 12 for graduate students

Student Credit Hour (SCH) to Degree

- NMHED has encouraged HEIs to adopt the 120 Bachelor's degree as a standard best practice
- Average number of credit hours fulltime students (BA/BA) require to complete a degree
- Average number of credit hours part-time students (BA/BA) require to complete a degree

Time to Degree (Undergraduate Students)

• Full-time 30 credits in one year

.

- Part-time 15 Credits in one year
- Students averaging 30 credits a year can complete a 120 credit hour Bachelor's degree in four years and an Associates degrees in two years
- Students averaging 15 credits a year can complete a 120 credit hour Bachelor's degree in eight years and an Associates degrees in four years

Four Year Undergraduate Graduation Rate AY 17-18

Percentage of Full-time Freshmen earning a Bachelor's degree within four years of beginning college as a first-time freshman

(Data provided by HEIs)

Completions by Race/ Ethnicity AY 16-17

The percentage of students, by race/ ethnicity

- Enrolled
- Enrolled as an undergraduate
- Earning a degree or certificate
- Earning an undergraduate degree
- Earning a Bachelor's degree
- Earning an Associate's degree
- Earning an undergraduate certificate

HEIs and the NMHED report race and ethnicity data using current IPEDS reporting categories

- These categories were developed in 1997 by the US Office of Management and Budget (OMB)
- The categories are mutually exclusive
- Students are placed in a race/ ethnicity category based on meeting the OMB's definition of a race or ethnic group
- A student will be placed in only one race/ethnicity group
- The first three categories are hierarchical
- Students meeting the OMB definition for these three categories are not included in subsequent categories:
 - Nonresident
 - Ace and Ethnicity unknown
 - Hispanics of any race
 - Non-Hispanic students identifying as two or more races are placed in a "Two or More Races" category
 - The remaining students are then identified as one of the following races
 - American Indian or Alaska Native
 - Asian
 - Oblight Black or African American
 - Native Hawaiian or Other Pacific Islander
 - ◊ White

IPEDS uses the following definitions to determine the race or ethnicity of each student

Hispanic or Latino

A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.

American Indian or Alaska Native

A person having origins in any of the original peoples of North and South America (including Central America) who maintains cultural identification through tribal affiliation or community attachment.

Asian

A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian Subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

Black or African American

A person having origins in any of the black racial groups of Africa.

Native Hawaiian or Other Pacific Islander

A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

White

A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

Nonresident non-citizen

A person who is not a citizen or national of the United States and who is in this country on a visa or temporary basis and does not have the right to remain indefinitely. Note: Nonresident aliens are to be reported separately in the places provided, rather than in any of the racial/ethnic categories described above.

Resident non-citizen (and other eligible non-citizens)

A person who is not a citizen or national of the United States but who has been admitted as a legal immigrant for the purpose of obtaining permanent resident alien status (and who holds either an alien registration card (Form I-551 or I-151), a Temporary Resident Card (Form I-688), or an Arrival-Departure Record (Form I-94) with a notation that conveys legal immigrant status such as Section 207 Refugee, Section 208 Asylee, Conditional Entrant Parolee or Cuban-Haitian).

Race/ethnicity unknown

The category used to report students or employees whose race and ethnicity are not known.

(Source: https://nces.ed.gov/ipeds/ report-your-data/race-ethnicitydefinitions)

Enrollment AY 17-18 (Summer & Fall 17, Spring 18)

Total Headcount

Total number of students enrolled in courses during the academic year

- A student enrolled in two semesters is counted twice
- A student enrolled in three semesters is counted three times

Graduate Students

 Total number of students enrolled in graduate courses during the academic year

Undergraduate Students

 Total number of students enrolled in undergraduate courses during the academic year

Dual Credit Students

 Total number of high school students enrolled, during the academic year, in courses offering both undergraduate and high school credit

Total Student FTE

- Total number of SCHs all students are enrolled in during the Fall semester
- Divided by 15 for undergraduate students (the number of SCHs required to meet the "Full-time" criteria for on-time graduation)
- Divided by 12 for graduate students

Dual Credit Student FTE

 Total number of SCHs Dual Credit students are enrolled in during the Fall semester, divided by 15

Dual Credit as % of Total Headcount

Percentage of Dual Credit Students

Student Course Load AY 17-18 (Summer & Fall 17, Spring 18) G12 +

 Graduate student enrolled in 12 or more Semester Credit Hours (SCHs)

G<12

• Graduate student enrolled in less than 12 SCHs

UG 15+

- Undergraduate student enrolled in 15 or more SCHs
- This is "Full-time" as defined by on track for on-time graduation
- If the student successfully passes all courses,
- Elects this course load in both semesters for four years, and
- Elects a program with a 120 SCH graduation requirement,
- They should graduate in four years

UG 12-14.9

- Undergraduate student enrolled in courses totaling between 12 and 14.9 SCHs.
- Many HEIs define a student as "Full-Time" if they enroll in at least 12 SCHs
- If the student successfully passes all courses,
- Elects this course load in both semesters for six years, and
- Elects a program with a 120 SCH graduation requirement,
- They should graduate in six years

UG <12

- Undergraduate student enrolled in courses totaling less than 12 SCHs
- A "Part-Time" student
- A student consistently enrolled in less than 12 SCHs per semester will not graduate in four years and is likely not to graduate in six years

Graduate Student

- A student that earned a bachelor's degree
- Students may or may not be pursuing an advanced degree, for example, a master's degree, a JD, or graduate certificate

Undergraduate Student

 A student that is pursuing a bachelor's degree, associate's degree, an undergraduate certificate, or is otherwise enrolled in undergraduate courses

Student Age Categories AY 17 -18 (Summer & Fall 17, Spring 18)

Dual Credit Student

- A High School Student enrolled in a designated dual credit course for both high school and college credit
- The student can be any age

UG < 18

- Undergraduate student enrolled exclusively in undergraduate courses at an HEI
- A student less than 18 years old at the beginning of an HEI semester
- Not a Dual Credit Student

UG 18-24

- Undergraduate student between the ages of 18 and 24
- Enrolled exclusively in undergraduate courses at an HEI
- Not a Dual Credit Student

UG 25+

- Undergraduate student at least 25 year old
- Enrolled exclusively in undergraduate courses at an HEI

G

- A graduate student
- The student can be any age
- Enrolled in one or more graduate level (post-baccalaureate/bachelor's) courses

Average Full-time In-District Tuition AY 17-18 per Semester

Full-time in District Undergraduate Tuition and Fees AY 17-18

Community Colleges

- Based on 12 SCHs
- In Geographic Areas of Responsibility

Four-Year universities, based on 15 SCHs

In-State

Community Service Hours AY 17-18

(Data provided by HEIs)

Number of hours, as reported by HEIs, students, faculty, and staff engaged in the community in K-12 Education, Workforce Development, or Civic Engagement projects

K-12 Education

- Activities that promote K-12 education
- Activities that provide supplemental instruction/academic exploration by K-12 students

Workforce Development

- Extracurricular activities that enhance the preparation of HEI students for workforce entry
- Activities that enhance the skills of local community members or prepare them for employment

Civic Engagement

- Activities that promote citizen involvement in the local community
- Activities that promote democracy and social justice

Revenue and Use of Funds per FTSE FY 17 (Restricted and Unrestricted funds aggregated)

Revenue Sources

Tuition & Fees Federal Revenue

- Federal Appropriations
- Federal Grants/Contracts

State Revenue

- State Appropriations
- State Grants/Contracts

Local Revenue

- Local Appropriations
- Local Government Grants & Contracts

Other Revenue

- Endowment Land and Permanent Fund Income
- Private Gifts/Grants/Contracts
- Sales and Services

Use of Funds

Instruction, research, and academic support

- General Academic Instruction
- Academic Support
- Research Activities

Student services and scholarships

- Student Services
- Student Aid Grants/Stipends

Institutional support and OM of Plant

- Institutional Support
- O&M (operations and maintenance) of Plant

Other

- Auxiliary Enterprises
- Internal Services
- Intercollegiate Athletics
- Independent Operations
- Social & Cultural Development Activities
- Public Service

Research Expenditures FY 17

Total research exp.

Total research expenditures

Fed. + priv. research exp.

per T/TT FTE faculty Federal and private research expenditures, divided by the number of tenured and tenure track faculty

At-Risk Students

Students are considered as being financially "at-risk" when their expected family contribution (EFC), compiled from FAFSA financial aid files submitted by institutions, is less than or equal to \$5,000 per year

Community colleges

If a student's EFC is less than or equal to \$5,000 in the current or previous year, then the student is considered as financially at-risk

Four-year universities

An EFC of less than or equal to \$5,000 during the current year or the previous three years qualifies a student is considered financially at-risk

At-Risk Degrees and Certificates Awarded AY 15-16

 Financial aid data reporting lags one year behind award data

At Risk Students-Degrees

- Number of degrees awarded to at risk students
- Percentage of degrees awarded to "at-risk" students

At Risk Students-Certificates

- Number of certificates awarded to at risk students
- Percentage of certificates awarded to "at-risk" students

Percent Median Salary Increases AY 17-18 to AY 18-19 (Data provided by HEIs)

All Full-time Faculty

 Faculty teaching the number of credit hours their HEI determines to be a full teaching load

All Part-Time Faculty

 Faculty teaching fewer credit hours than their HEI determines to be a full teaching load

Promoted (Assistant to Associate Professor) Full-Time Faculty

 Increases for full-time faculty members promoted from Assistant Professor to Associate Professor in either academic year

Promoted (Associate Professor to Professor) Full-Time Faculty

 Increases for full-time faculty members promoted from Associate Professor to Professor in either academic year

Non-promoted Full-Time Faculty

 Increases for faculty members not promoted in either academic year

Faculty

(Data provided by HEIs) Full-time

- NMHED Financial Reporting Manual defines the full-time equivalent is determined on the basis of contract, with a full-time nine-month contract or a full-time twelve month contract, etc., equal to one FTE".
- For faculty not covered by a contract the NMHED defers to each HEI's criteria, however if an institution has not established one our guidance is 12 credit hours in Fall and Spring, and 6 credit hours in Summer

Part-time

 Faculty not meeting the definition of "Full-time"

Tenure track

- Tenured faculty
- Probationary faculty appointments potentially leading to tenure

Percent Tenured/tenure track faculty

 Percentage of faculty that is either tenured or on a tenure track

Total Faculty

 Total number of faculty, regardless of rank or employment status

FTE

 Total number of credit hours taught during the Fall semester, divided by 12 (or the number of credit hours an HEI defines as a Full-time teaching load)

Student-Faculty ratio

 The number of students who attend an HEI in the Fall semester divided by the number of faculty at the institution
